

All parts of the assignment will be turned in at the end of the lab. Place your name on the back of this sheet of paper and nowhere else. Staple your answers on the front of this sheet of paper. Failure to follow these directions will cost you 10 points. Your assignment will be typed, except graphs can be drawn by hand and mathematical equations can be done by hand. Failure to type it will cost you 10 points. If you use double-sided printing or print on the back of scrap paper, I will give you one additional point.

1) (10 points) Which part of my web page, <http://www.WCsaplarJr.info> do you think will be most helpful? Why? Is anything missing that you would like to see? What is the URL for the first exam from this class during the last semester it was taught? If you were a International Economics major, then what *comps* would you take on the Tuesday morning of *comps* week?

2) (10 points) Why is GNI per capita a poor measure of how happy the people are? Give at least two reasons and explain them.

3) (20 points) Suppose a country has an average life expectancy of 60 years. Their expected number of years of schooling is 15 years. Their mean number of years of school years of schooling is 12 years. Their GNI per capita is \$40,000. Find the values for the three components of the HDI and then find the value of the HDI. Obviously, you will need to use a calculator. However, I want you to write out each of the calculations and briefly state where you got them from. Why category of development is this country? Note that the numbers in the book are wrong. Use the numbers I gave in class which were gotten from the Human Development report. http://hdr.undp.org/sites/default/files/hdr2018_technical_notes.pdf

4) (15 points each) Answer each part in separate paragraphs. For each of the following Millennium Development Goals, explain why the goal is important. Then state if the goal was met.

A) Achieve full and productive employment and decent work for all including women and young people.

B) Ensure that by 2015, children everywhere, boys and girls alike, will be able to complete a full course of primary schooling.

C) Integrate the principles of sustainable development into country policies and programs and reverse the loss of environmental resources.

D) Deal comprehensively with the debt problems of developnig countries through national and international measures in order to make debt sustainable in the long run.
